Case Study – Project A (London, UK)

Brief: large marketing company requiring fitting out of workspace with **200+ height-adjustable desks**, plus meeting & breakout facilities.

- Worked closely with its dealer partner and the client's architect, providing **full design support** and their **factory-backed customisation** capabilities.
- We successfully worked with our factory to combine **standard & bespoke products**, customising the **AXEL** height-adjustable desk range with **SOLANGE** acoustic fabric screens.
- **Delivery and installation completed in 2 days**, shipping direct from our factory in France.

Case Study – Project B (Cork, Ireland)

Brief: submit a **design proposal** based on architectural plans, to re-fit client's 1st floor with **200+ height-adjustable desks**. Phase 1 fit-out eventually resulted in Phase 2 & 3 for the other floors.

- We produced several **visualisation proposals** based on exchanges with the dealer & client, illustrating several options framed around client expectations. Client then chose the option that best suited their requirements.
- **Customisation** of **AXEL HA** range to include a **deeper cable** for positioning of client IT department RCD modules in relation to the floor boxes. Inclusion of various Camira Blazer covered **SOLANGE** acoustic fabric screens.
- **Direct Delivery and installation to site was fast-tracked** to meet client needs. Installation completed over a weekend.

Case Study – Project C (Lyon, France)

Brief: supply & design the furniture as part of the fit-out of a major French bank. Client was looking to create a **clean, stylish work environment** that would provide each employee with their **own storage** facility.

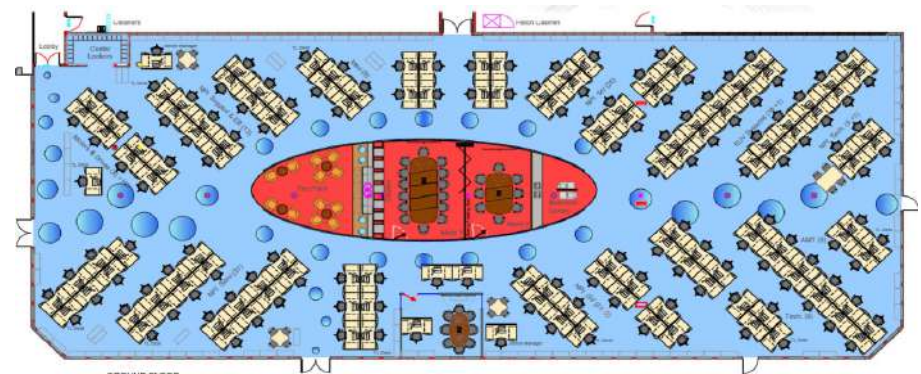

- Customisation of **4Most** thanks to our factory support, incorporating **bespoke storage** return/locker units for 150+ workforce, plus breakout and meeting room furniture in several areas around the office.
- **Factory involvement form start to finish**, converting visualisations into working technical drawings for the client to sign off,.
- Manufacture of all products to meet client deadline.

Case Study – Project D (Surrey, UK)

Brief: supply & design the furniture as part of the fit-out of a large engineering company. Client was looking to create a **fresh and contemporary work environment**.

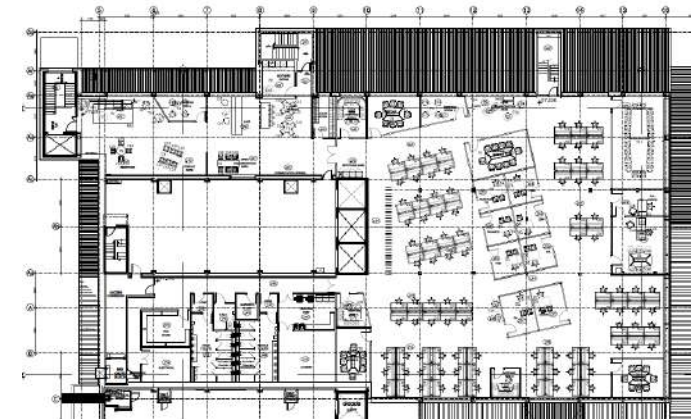

- Customisation of the **4Most** range to provide each employee with a double-wave desktop, including a **bespoke pull-out storage drawer** & acoustic desktop screens.
- **Factory involvement from start to finish** in this challenging project , including supply of a prototype desking cluster to allow a 'test-run'.
- Project win translated into a **direct delivery & installation over a weekend**.

Case Study – Project E (Wexford, Ireland)

Brief: supply & design the furniture as part of the fit-out of a major food company looking to provide their staff with a new fresh & contemporary **working environment**.

- EOL worked **closely with the client's architect** on all aspects including specific design options for the open plan desking, meeting rooms, breakout and executive offices.
- **Production of visualisations & technical studies** to illustrate proposals.
- EOL **factory involvement from start to finish** in a multi-faceted project with extremely tight lead times and **various specials** to meet the client's requirements.

Case Study – Project F (Antwerp, Belgium)

Brief: supply & design the furnishings as part of the fit-out of a large engineering company with a mixture of system and break-out furniture.

- Customisation of the **4Most** range to create boardroom & canteen environments in the company corporate colours.
- EOL factory involvement from start to finish in this challenging project.
- Direct delivery from factory to site & installation over a weekend.

Case Study – Project G (London, UK)

Brief: large marketing company requiring custom supply and fitting out of an entire floor according to architectural plans. End objective being to roll-out a 'look' and use the EOL floorplate as a design template for their other offices.

- Customisation of the **4Most & ARSENE** ranges for open plan & meeting rooms working closely with the dealer & architect to create the client's desired result.
 - EOL factory involvement from start to finish in this challenging project.
 - Direct delivery from factory to site & installation over a weekend.

Case Study – Project H (Manchester, UK)

Brief: supply & design the furniture as part of the fit-out of a major food company looking to upgrade their existing furniture with a contemporary environment.

- EOL worked to brief and supplied **design studies & space-planning proposals** for the client to review.
- EOL **factory involvement from start to finish** providing detailed technical & quotation support.
